

## Kitten Kit Information

We want your kitten to go home with food, litter and toys that they have while they are in our care. We have done extensive research on products for your kitten. We use only the best quality products that are safe and all natural for your kitten. We feel breeding is a huge responsibility and we take it very seriously just like we feel owning a pet is a huge responsibility.

We expect you to seek advice and help when/if problems arise with your kitten. Our doors are always open to our pet buyers for advice. We expect you to let us know if you cannot keep the kitten for any reason. We will take the kitten back no matter the age or reason in order to help place the kitten/cat in another qualified home.

Our kittens DO NOT come altered. Altering your pet is your responsibility unless the kitten is 6 months or older when you receive the kitten. If this is the case the kitten will be altered and come with the registration papers.

We also DO NOT allow our kittens outside. Cats can live happy and much healthier lives inside. If you feel cats need to roam outside then our kittens are not for you.

We also DO NOT allow the kitten to be de-clawed. If you do not feel you can clip the kittens nails or have scratching posts available for your kitten then we will not sell our kittens to you.

We view this as an inhuman act and mistreatment of our kittens. We take de-clawing very seriously and provide plenty of documentation telling owners what de-clawing is and why cats have the natural instinct to claw. Ragamuffins tend to be "soft pawed" which means they use their claws less frequently when playing.
